

A PROFITABLE WAY TO SPOIL YOUR CUSTOMERS

The elegant, attractive PROFESSIONAL Drink Mixer combined with your creativity will convince each and every one of your customers. At the bar, in hotels, restaurants and cafés, perfectly prepared and presented mixed drinks of all kinds—shakes, cocktails or frappés—are always a favourite. With a minimum of effort you can increase your turnover and return. The attractive colors and the design fit in every bar or service counter perfectly.

Variable speed

An important advantage of the PROFESSIONAL Drink Mixer is its variable speed function. You can adjust the speed to individual needs, so different drinks can be mixed exactly right. The high turbulence double-whirl guarantees a fast and absolutely homogenous preparation of the ingredients. It is even possible to add pieces of ice to chill the drink—the ice remains whole and won't water it down.

Further advantages

- ◆ high quality built to last through daily, professional use
- ◆ easy to clean thanks to the perfect construction and smooth surfaces
- ◆ rust-free metal housing, no plastic
- ◆ the motor is rubber housed and fully insulated with an electric double protection insulation
- ◆ low operation noise and vibration
- ◆ stable construction
- ◆ tested according to SEV CE standards

Function

The Operation is simple: when the container is clicked in, the motor starts automatically. Remove the container and the motor turns off. The speed can be manually adjusted during operation.

Colors and design

The PROFESSIONAL Drink Mixer is available in the following colors:

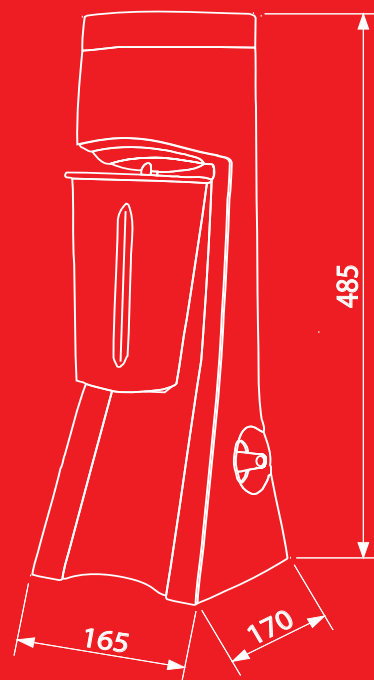

- ◆ silver grey/blue
- ◆ chromium plated/blue
- ◆ black
