The high performance commercial juicer

PROFESSIONAL M

GET OUT THE BEST OF THE FRUIT

THE VITAMAT POWERJUICER

No limits are imposed on your imagination: juices from local or exotic fruits, from all kinds of vegetables, even sophisticated juice cocktails can be prepared quickly and easily before your customer's very eyes.

Many so-called natural products are sold today. But the customers know: the **purest juices** (free from preservatives and other chemical additives) always come straight from the fresh fruit or vegetable.

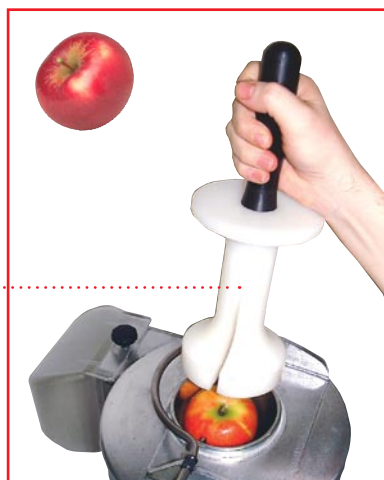

So pamper your clients, guests or patients with natural, healthy fruit and vegetable juices freshly made with the **Vitammat PowerJuicer**. The Vitamat is an extremely stable and robust juicer for professionals, easily meeting all the demands of the hard daily service.

EASY TO CLEAN

PROFESS

THE VITAMAT POWERJUICER PLUS

The **version „Plus“** of the Vitamat PowerJuicer is equipped with a special lid. This has a **round** fill in feed chute with an inner diameter of 10 cm, in comparison to the standard lid with the semicircular shaped opening. The round chute allows an optimal and fast processing of **soft, round fruits**, (like apples, pears, peeled oranges, etc.) without cutting them first.

Accessories

For **smaller and hard** fruits and vegetables, like carrots etc., a reduced shaped insert should be used, because these products may become stuck or even jump out of the round chute. Furthermore the needed power to process hard vegetables is lower with the reduced shaped opening, resulting in lower overall processing time, even though you have to cut some products first. With the insert in place, the chute has the same dimension as the standard lid of the PowerJuicer.

THE VITAMAT POWERJUICER

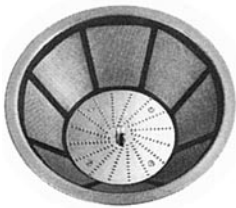

The **Vitammat PowerJuicer** allows constant production of fresh and natural fruit and vegetable juices. The residue is continually and **automatically ejected** into a large container or through a tube into a container underneath the counter. The pulp chute can be **turned 90°** to facilitate installation.

The now still stronger motor and the large feed chute allow large quantities to be processed. The special centrifugal strainer basket is made entirely of **stainless steel**. The stainless steel grating disc is screwed into the strainer basket and can be easily replaced, if worn out.

The **Vitammat PowerJuicer** conforms to the today's safety and hygiene regulations. The motor only runs when lid and safety clasp are closed. Opening the safety clasp activates a **braking device** which immediately stops the centrifugal strainer basket, thus avoiding any danger of injury from rotating parts.

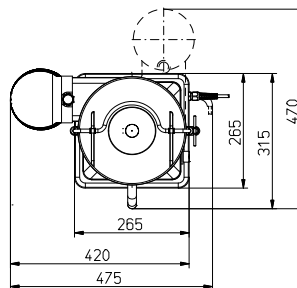

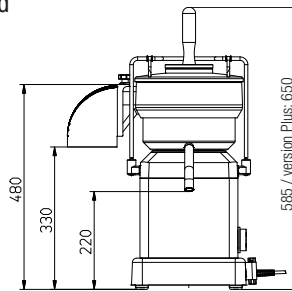

Special features of the Vitamat PowerJuicer

- ✓ Excellent juice yield
- ✓ High performance, juices large quantities of fruit or vegetables
- ✓ Powerful and quiet direct drive with brake
- ✓ High-temperature resistant motor (class H) with fan

The New Vitamat Power Juicer

We are always anxious to improve our machines and this we have done with our Rotor Vitamat Power Juicers. The improvements include:

- Big stainless steel ball bearings for more robustness and longer lifetime
- New juice collecting bowl for easier cleaning and better protection of the seal
- Lightweight brake disk for less vibration
- Optimized grating disc with more teeth for more performance
- New screw for the basket fixture

Prior Version New Version

New Juice Collecting Bowl

The New Vitamat Power Juicer Plus Inox

The new version Vitamat Power Juicer Plus **Inox** ("Inox" means stainless steel) features important improvements compared with the Vitamat Power Juicer Plus:

- Stainless steel lid with round feed chute (93.5mm), without the big blade, only with a small winglet. Juicing is really easier!
- Perfect cleaning and improved waste ejection.
- New plunger without gap for easy cleaning
- Plus all the improvements identified above
